

Expropriating Land

Philipp Stehr

October 30th 2025

Introduction

- this is going to be analytic philosophy

Introduction

- this is going to be analytic philosophy
- trying to categorise and clarify things

Introduction

- this is going to be analytic philosophy
- trying to categorise and clarify things
- please be patient when it comes to the empirical side

An Overview

- Can expropriation be a helpful tool in combating objectionable land use?

An Overview

- Can expropriation be a helpful tool in combating objectionable land use?
- build on a previously developed model

An Overview

- Can expropriation be a helpful tool in combating objectionable land use?
- build on a previously developed model
- distinguish two general cases

An Overview

- Can expropriation be a helpful tool in combating objectionable land use?
- build on a previously developed model
- distinguish two general cases
- and what expropriation should look like in each case

The Expropriation Model

Stehr, Philipp. 2025. 'Expropriation as a Measure of Corporate Reform: Learning from the Berlin Initiative'. *European Journal of Political Theory* 24 (1): 70–91.

- my attempt at a general model for expropriating corporations

The Expropriation Model

Stehr, Philipp. 2025. 'Expropriation as a Measure of Corporate Reform: Learning from the Berlin Initiative'. *European Journal of Political Theory* 24 (1): 70–91.

- my attempt at a general model for expropriating corporations
- i.e. when, why, how

The Expropriation Model

Stehr, Philipp. 2025. 'Expropriation as a Measure of Corporate Reform: Learning from the Berlin Initiative'. *European Journal of Political Theory* 24 (1): 70–91.

- my attempt at a general model for expropriating corporations
- i.e. when, why, how
- key point: when they've failed properly administering goods

The Expropriation Model

Stehr, Philipp. 2025. 'Expropriation as a Measure of Corporate Reform: Learning from the Berlin Initiative'. *European Journal of Political Theory* 24 (1): 70–91.

- my attempt at a general model for expropriating corporations
- i.e. when, why, how
- key point: when they've failed properly administering goods
- because corporations are a type of property regime

The Expropriation Model

Stehr, Philipp. 2025. 'Expropriation as a Measure of Corporate Reform: Learning from the Berlin Initiative'. *European Journal of Political Theory* 24 (1): 70–91.

- my attempt at a general model for expropriating corporations
- i.e. when, why, how
- key point: when they've failed properly administering goods
- because corporations are a type of property regime
- and it's legitimate for the state to determine different kinds of property regimes

The Expropriation Model

Stehr, Philipp. 2025. 'Expropriation as a Measure of Corporate Reform: Learning from the Berlin Initiative'. *European Journal of Political Theory* 24 (1): 70–91.

- my attempt at a general model for expropriating corporations
- i.e. when, why, how
- key point: when they've failed properly administering goods
- because corporations are a type of property regime
- and it's legitimate for the state to determine different kinds of property regimes
- post-expropriation institutions depend on the type of failure

The Expropriation Model

Stehr, Philipp. 2025. 'Expropriation as a Measure of Corporate Reform: Learning from the Berlin Initiative'. *European Journal of Political Theory* 24 (1): 70–91.

- my attempt at a general model for expropriating corporations
- i.e. when, why, how
- key point: when they've failed properly administering goods
- because corporations are a type of property regime
- and it's legitimate for the state to determine different kinds of property regimes
- post-expropriation institutions depend on the type of failure
- expropriation != socialization

The Expropriation Model

Stehr, Philipp. 2025. 'Expropriation as a Measure of Corporate Reform: Learning from the Berlin Initiative'. *European Journal of Political Theory* 24 (1): 70–91.

- my attempt at a general model for expropriating corporations
- i.e. when, why, how
- key point: when they've failed properly administering goods
- because corporations are a type of property regime
- and it's legitimate for the state to determine different kinds of property regimes
- post-expropriation institutions depend on the type of failure
- expropriation != socialization
- expropriation is the tool, not the goal

Applying it to Agriculture

- focus on agriculture in industrial societies for simplicity

Applying it to Agriculture

- focus on agriculture in industrial societies for simplicity
- a widespread model: private or corporate ownership of large amounts of land

Applying it to Agriculture

- focus on agriculture in industrial societies for simplicity
- a widespread model: private or corporate ownership of large amounts of land
- and there are problems with these models of ownership

Applying it to Agriculture

- focus on agriculture in industrial societies for simplicity
- a widespread model: private or corporate ownership of large amounts of land
- and there are problems with these models of ownership
- so we should think about if/how expropriation can help

Applying it to Agriculture

- focus on agriculture in industrial societies for simplicity
- a widespread model: private or corporate ownership of large amounts of land
- and there are problems with these models of ownership
- so we should think about if/how expropriation can help
- focus on two problems:

Applying it to Agriculture

- focus on agriculture in industrial societies for simplicity
- a widespread model: private or corporate ownership of large amounts of land
- and there are problems with these models of ownership
- so we should think about if/how expropriation can help
- focus on two problems:
 - ▶ externalities

Applying it to Agriculture

- focus on agriculture in industrial societies for simplicity
- a widespread model: private or corporate ownership of large amounts of land
- and there are problems with these models of ownership
- so we should think about if/how expropriation can help
- focus on two problems:
 - ▶ externalities
 - ▶ exploitation

The Problem with Agriculture I: Externalities

- a well-established general problem

The Problem with Agriculture I: Externalities

- a well-established general problem
- imposing harms on others without costs

The Problem with Agriculture I: Externalities

- a well-established general problem
- imposing harms on others without costs
- example: Dutch Nitrogen problem

The Problem with Agriculture I: Externalities

- a well-established general problem
- imposing harms on others without costs
- example: Dutch Nitrogen problem
- farmers emit without having to pay

The Problem with Agriculture I: Externalities

- a well-established general problem
- imposing harms on others without costs
- example: Dutch Nitrogen problem
- farmers emit without having to pay
- so they over-emit with impunity

Combating Externalities through Expropriation?

- essentially an abuse of lacklustre regulatory frameworks

Combating Externalities through Expropriation?

- essentially an abuse of lacklustre regulatory frameworks
- is effective regulation feasible?

Combating Externalities through Expropriation?

- essentially an abuse of lacklustre regulatory frameworks
- is effective regulation feasible?
- if not, is a shift in property regime desirable?

Combating Externalities through Expropriation?

- essentially an abuse of lacklustre regulatory frameworks
- is effective regulation feasible?
- if not, is a shift in property regime desirable?
- expropriation can enable shifts in property regimes

Property Regimes that Prevent Externalities?

- but what's the better alternative to corporate ownership?

Property Regimes that Prevent Externalities?

- but what's the better alternative to corporate ownership?
 - ▶ democratic ownership?

Property Regimes that Prevent Externalities?

- but what's the better alternative to corporate ownership?
 - ▶ democratic ownership?
 - ▶ public ownership?

Property Regimes that Prevent Externalities?

- but what's the better alternative to corporate ownership?
 - ▶ democratic ownership?
 - ▶ public ownership?
 - ▶ other forms of ownership?

Property Regimes that Prevent Externalities?

- but what's the better alternative to corporate ownership?
 - ▶ democratic ownership?
 - ▶ public ownership?
 - ▶ other forms of ownership?
- is there a connection between democratization and less externalities?

Property Regimes that Prevent Externalities?

- but what's the better alternative to corporate ownership?
 - ▶ democratic ownership?
 - ▶ public ownership?
 - ▶ other forms of ownership?
- is there a connection between democratization and less externalities?
- maybe: people don't want to harm themselves

Property Regimes that Prevent Externalities?

- but what's the better alternative to corporate ownership?
 - ▶ democratic ownership?
 - ▶ public ownership?
 - ▶ other forms of ownership?
- is there a connection between democratization and less externalities?
- maybe: people don't want to harm themselves
- maybe not: they aren't that rational

Property Regimes that Prevent Externalities?

- but what's the better alternative to corporate ownership?
 - ▶ democratic ownership?
 - ▶ public ownership?
 - ▶ other forms of ownership?
- is there a connection between democratization and less externalities?
- maybe: people don't want to harm themselves
- maybe not: they aren't that rational
- maybe not: some externalities might harm people far enough away

Property Regimes that Prevent Externalities?

- but what's the better alternative to corporate ownership?
 - ▶ democratic ownership?
 - ▶ public ownership?
 - ▶ other forms of ownership?
- is there a connection between democratization and less externalities?
- maybe: people don't want to harm themselves
- maybe not: they aren't that rational
- maybe not: some externalities might harm people far enough away
- alternatively: some kind of no-use land trust or foundation?

The Problem with Agriculture II: Exploitation

- land ownership also enables control over people

The Problem with Agriculture II: Exploitation

- land ownership also enables control over people
- in particular, workers

The Problem with Agriculture II: Exploitation

- land ownership also enables control over people
- in particular, workers
- the old man's argument: people depend on access to the means of production for their livelihood

The Problem with Agriculture II: Exploitation

- land ownership also enables control over people
- in particular, workers
- the old man's argument: people depend on access to the means of production for their livelihood
- example: seasonal workers in Germany

The Problem with Agriculture II: Exploitation

- land ownership also enables control over people
- in particular, workers
- the old man's argument: people depend on access to the means of production for their livelihood
- example: seasonal workers in Germany
- vulnerable positions vs. power through ownership

The Problem with Agriculture II: Exploitation

- land ownership also enables control over people
- in particular, workers
- the old man's argument: people depend on access to the means of production for their livelihood
- example: seasonal workers in Germany
- vulnerable positions vs. power through ownership
- that power is objectionable

Combating Exploitation through Expropriation?

- more effective regulation might help to some extent

Combating Exploitation through Expropriation?

- more effective regulation might help to some extent
- but the core problem is control over scarce resources

Combating Exploitation through Expropriation?

- more effective regulation might help to some extent
- but the core problem is control over scarce resources
- here, democratization clearly can be effective

Combating Exploitation through Expropriation?

- more effective regulation might help to some extent
- but the core problem is control over scarce resources
- here, democratization clearly can be effective
- give control to workers

Combating Exploitation through Expropriation?

- more effective regulation might help to some extent
- but the core problem is control over scarce resources
- here, democratization clearly can be effective
- give control to workers
- e.g. worker cooperatives

Recap

- expropriation can help solve both externalities and exploitation

Recap

- expropriation can help solve both externalities and exploitation
- externalities: expropriate to forms of property with less of an incentive to extractive use

Recap

- expropriation can help solve both externalities and exploitation
- externalities: expropriate to forms of property with less of an incentive to extractive use
- exploitation: expropriate to democratic forms that give control to workers

The End

Thank you!
